Mobile Application Development – CA1: Review 1
Idea & Proposal Review

Milestone: Problem definition, concept, and project scope

Section	Details
Group Number	5
Team Members	SHUBHAM PANDEY, Aradhya Raj
Title	CampusConnect – Event & Study Group Finder
App Name	CampusConnect
Problem Statement	Campus communication is scattered across WhatsApp groups, email chains, and physical notice boards. This causes students to miss academic workshops or social events, makes it difficult to find peer-to-peer help immediately, and leaves no centralized platform for trading student resources.
Abstract	CampusConnect is a social ecosystem tailored for university students. It provides a central hub for discovering events, joining study groups, and engaging in a student-led marketplace. The app emphasizes spontaneous collaboration and community trust.
Target Users	University students / campus student community
Planned Core Features	1. Discover Feed – event listings with category filtering and search; 2. Study Hub – academic groups and peer tutoring; 3. Student-led marketplace; 4. QR check-in and Lost & Found tools; 5. Campus Karma and badges.
App Icon	CampusConnect branding / logo (specific icon artwork is not provided in the source files).

Mobile Application Development – CA1: Review 2
UI/UX Design Review

Milestone: Wireframes, mockups, and visual design language

Section	Details
Group Number	5
Team Members	SHUBHAM PANDEY, Aradhya Raj
Title	CampusConnect – Event & Study Group Finder
App Name	CampusConnect
Screens Designed	Splash Screen; Home Feed; Bottom Navigation; Discover/Event screens; Study Hub; Profile; QR Check-in; Event Chat; Interactive Polls; Marketplace; Campus Karma/Badges; Avatar Picker.
Wireframe / Mockup Tool	XML Layouts with Material 3 Components; Kotlin; MVVM architecture.
Colour Palette & Typography	Deep Purple & Indigo palette with a standardized Material 3 visual language. Specific font family is not specified in the source material.
Design Consistency Notes	Standardized theme and Material 3 components are used across screens, with a focus on consistent visual treatment and readable presentation.
Layout & Visual Balance	Immersive full-width cards are used for the Home Feed, with consistent spacing and alignment. Bottom Navigation connects Home, Groups, Calendar, and Profile; the Quick Scroll strip supports navigation.
Add-ons as per Remarks	Implemented QR check-in, reactive event chat using Kotlin Flows, live interactive polls, Campus Karma, Skill Swap Economy, Flash Sessions, and DiceBear avatar personalization. SVG/avatar-picker issues were resolved using PNG characters, coil-svg support, and a Select-then-Confirm flow.

Evaluation – UI Design & Visual Appeal

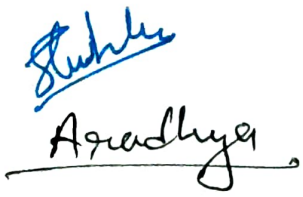

Remarks: UI/UX polish includes the Deep Purple & Indigo theme, Material 3 components, Quick Scroll, and avatar personalization.

Mobile Application Development – CA3: Review 3

App Development & Functionality Review

Milestone: Core app build and functional integration of the AI feature

Section	Details
Group Number	7
Team Members	Shubham Pandey, Aradhya Raj
Title	CampusConnect - Event & Study Group Finder
App Name	CampusConnect
Features Implemented	AI event creation and scheduling; notifications and reminders; enrollment-based access control; intelligent similar-event search.
Tech Stack Used	Android Studio / Kotlin; XML + Material 3; MVVM + Repository; Room / SQLite; Coroutines & Flows; Firebase / FCM; WorkManager; Navigation Component; ZXing; Coil.
AI Feature Functionality	Input: natural-language event request or search query. Processing: extract/validate/schedule event, check enrollment, match and rank similar events. Output: event, notification, access/search results.
Error Handling / Edge Cases	Missing/invalid details -> clarification. AI/network failure -> fallback. Unauthorized/non-enrolled user -> restricted access denied. Duplicate, full or conflicting event -> validation warning.
Known Issues / Bugs	FCM/backend configuration and complete notification testing remain to be completed/verified before the next review.
Add-ons as per Remarks	AI natural-language event assistant; similar/typo-tolerant search; enrolled-user notifications and protected access; event reminders and notification deep links.

Evaluation – Application Functionality

Mobile Application Development – CA1: Review 4

UX, Navigation & Usability Testing

Milestone: User flow, interactivity, and usability feedback

Section	Details
Group Number	7
Team Members	Aradhya Raj Shubham Pandey
Title	CampusConnect 2.0
App Name	CampusConnect
Navigation Flow Summary	The student flow uses a bottom navigation bar with Home, Groups, My Events/Calendar and Profile. From Home, users can search campus events, apply category filters, open event details, ask CampusConnect AI and access notifications. Event details provide actions such as RSVP/Going, joining a waitlist, viewing the location on a map, and accessing event-related functions. Organizer and Admin users are routed to separate role-specific dashboards after login. Organizer navigation includes Dashboard, My Events, Create, Analytics and Profile; Admin navigation includes Dashboard, Users, Moderation, Analytics and Profile.
Interactive Components Used	Material 3 buttons, outlined text fields, chips and chip groups, BottomNavigationView, MaterialToolbar, RecyclerViews/lists, MaterialCardViews, ImageButtons, FloatingActionButtons, dialogs, bottom sheets, switches, date/time input dialogs, scrollable containers, QR actions, map actions, notification controls and role-specific dashboard controls.
Usability Testing Method	No formal participant usability-testing record is included in the supplied project. The available evidence supports a code/layout-based usability walkthrough of the implemented navigation and interaction flows, including student, organizer and admin journeys. The project contains accessibility-oriented content descriptions and minimum touch-target settings that can be checked during testing.
Usability Feedback Received	No external user-feedback results are documented in the supplied project. From the implemented UI structure, the main usability strengths are clear role-based navigation, direct event search/filter access, dedicated AI entry points, loading/empty/offline states and confirmation dialogs. A formal peer/user test should be performed to validate these assumptions before final submission.
Navigation Improvements Planned	Conduct peer testing of the complete student, organizer and admin flows; verify back navigation from secondary screens; validate bottom-navigation state after returning from child activities; test long lists and scrolling on smaller screens; and confirm that empty, offline, loading and AI-unavailable states remain understandable to first-time users.
Add-ons as per Remarks	The implementation already includes role-based dashboard routing, bottom navigation for the main use roles, search and quick filters, dedicated AI access, offline and empty-state messaging, loading indicators accessibility content descriptions, and interactive dialogs/bottom sheets. These additions strengthen th navigation and usability of the application.

Evaluation – User Experience & Navigation

Mobile Application Development – CA1: Review 5

Final Presentation & Deployment Review

Milestone: Completed app, deployment, and final demo

Section	Details
Group Number	7
Team Members	Aradhya Raj & Shubham Pandey
Title	CampusConnect 2.0 – Mobile Application Development, CA1 Review 5
App Name	CampusConnect
Deployment Details	https://github.com/aradhyaraj20/CampusConnect
Final Feature Summary	Role-based dashboards & routing for Student, Organizer, and Admin, with session persistence. • Student: NLP-based event search with explanations, event discovery, RSVP with waitlist promotion, QR ticket, chat, polls, notifications. • Organizer: conversational AI event creation, event preview, schedule-conflict handling, photo upload, full edit/delete, email attendees (BCC via device email app), WorkManager reminders. • Admin: paginated user management (SQL LIMIT/OFFSET, search + role filters) for scale, moderation actions (warn/suspend/remove/dismiss), analytics, ad management with dismissible home-feed banner. • Course-scoped leaderboard ("Legends") ranking students against classmates on the same course. • Auto-cleanup: WorkManager job (AccountCleanupWorker) daily-deletes inactive student accounts after course end + 60 days of inactivity; admin can also trigger it manually. • Study Groups, Skill Exchange & Karma, dark mode, offline banner, search loading state, empty-state AI fallback, and accessibility labels on key controls. • New "My Profile" tab for Organizer/Admin with avatar, bio, interests, and role-relevant stats. • Unit tests covering RBAC, RSVP/waitlist logic, QR valid/invalid/expired flows, search scoring, and AI parse (complete vs incomplete).
Demo Notes	Live walkthrough of the three role journeys using the seeded demo accounts: • Student (aradhya@email.com) – login, NLP search, event RSVP, waitlist promotion, QR ticket, chat/polls. • Organizer (cs@campus.edu) – AI-assisted event creation with conflict check, event photo, edit/delete, email attendees, QR scanner (organizer-only). • Admin (admin@campus.edu) – paginated user management, moderation actions, ad creation, analytics, manual inactive-account cleanup. Password for all demo accounts: password. Additional demo points: dark mode toggle, offline banner behaviour, and the Home feed ad banner.
Project Report Submitted	Yes (All the reviews are done on time and attach along this review and also uploaded on github)
